

The results of the year

Last year, like any other, was marked with some failures and the routine daily work. Maybe it is the main sense of our communication with the public. Perhaps, the most interesting part of our work was to develop our traditional wall-calendar “Houses” where we showed our recent objects of the architectural illumination having changed its design. The quarterly calendar was also designed in a different manner: it is possible to trace the “connection of times” from the old works to the present day projects. Of course, it is the main achievement of the two talented designers: Tatiana Koscheenko and Vilen Vereshchagin. All our colleagues will be able to evaluate the result of our search, disputes and discussions on the eve of the coming year.

In the upcoming 2014 year I will take part in the exhibition “Light & Building”, which will be held from March 30 to April 4 in Frankfurt; it will be the most interesting, difficult and responsible event for me. In 2000 we were the first Russian company that took part in this exhibition in the section “Light”. Our little stand aroused keen interest then. Today, after a long break, we represent a big Holding “BL Group”. It is a multidisciplinary task to present our capabilities and results of the projects implemented on the stand, to create the atmosphere of a night city for the visitors, to evoke positive feelings and to show the latest models of lighting fixtures available as a tool for the implementation of the urban lighting; besides this task requires a successful design solution. Therefore, the project is already being elaborated together with the companies of the Holding structure.

I congratulate our colleagues with the upcoming New year and I wish you health, happiness, success, and what is more - a little more kindness and attention to each other. Only When we are together we are strong and invincible!
